

Jacobsberg-Allenberg, Switzerland, 27 February 1975, 10:50. In this view the white light between the two bottom cones can be clearly seen. The witness noticed that the gap was not always the same, as though the central cone could be raised and lowered. This is not a reflection.

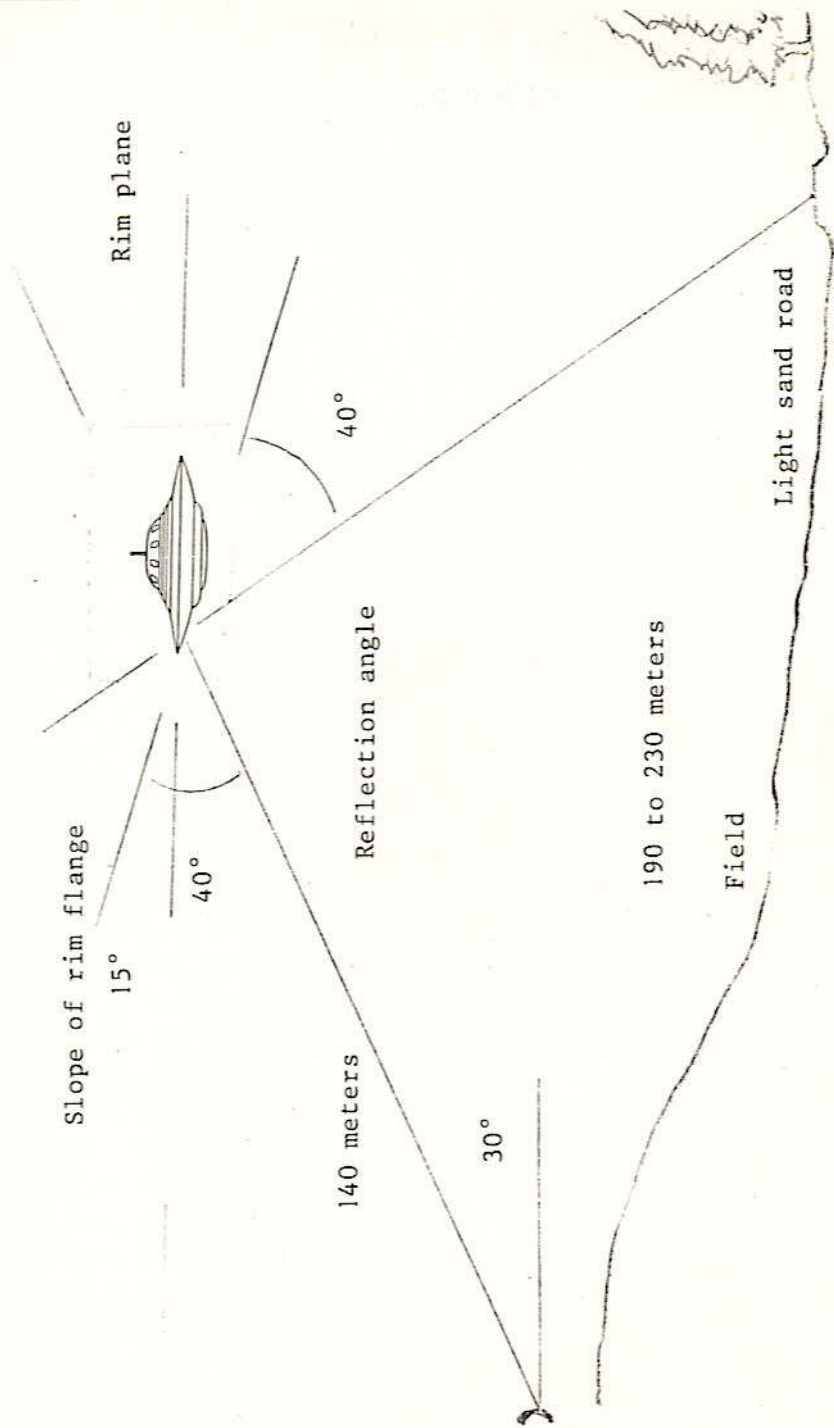

Ober-Sadelegg, Switzerland, 8 March 1975, 17:20. Eduard Meier was led by telepathy to this beautiful spot for this sequence of pictures of the new second variation of the 7-meter Beamship used by the visitors.

Ober-Sadelegg, Switzerland, 8 March 1975, 17:20. The beautiful ship moved away and toward the left as it continued its wandering line of travel across the grassy meadow before it changed direction to the north.

Ober-Sadelegg, Switzerland, 8 March 1975, 17:20. The craft moves north along its track to chart position number 6 as it continues to the end of that treeline. Meier has changed position little during this.

Reflected Angle Diagram

A light sandy road is reflected in the under rim of the 2nd variation ship printed in color on page 20 of UFO CONTACT FROM THE PLEIADES, Vol I, pictorial. This image can only be reflected from a large ship at a considerable distance from the camera.

Hasenbol-Langenberg, Switzerland, 29 March 1976, 18:10. The big ship slows out over the valley and makes a carefully controlled approach to just beyond the larger of the bare-limbed trees in center foreground.
